Cihan University–Sulaimaniya
Student Guide
2022 - 2023

About
the
University

Cihan University Sulaimnayia is a private English – speaking institution except for the Law Department subjects that are taught and delivered in Arabic and Kurdish. The university has been recognized by both the Kurdish Ministry of Higher Education and Scientific Research and the Iraqi Ministry of Higher Education and Scientific Research. The university campus consists of a newly built, modern, fully equipped, and spacious complex of buildings that house its academic departments, administrative offices, and student service facilities.

Cihan University Sulaimnayia facilities are dedicated to supporting the educational and research missions of the University by maintaining a safe, beautiful, and functional campus environment. And this is not an easy task, dedicated staff and personnel with high motivation and skills work hard to maintain the university.

The university offers various fields of study. The academic year is divided into two study periods and semesters, except the college of Law covers a yearly system. Cihan University – Sulaimnay offers a range of choices to allow you to choose the subjects in which students are interested.

As a university, our task is to advance and promote the process of learning in Kurdistan as well as the Middle East. The university offers students the knowledge and skills needed to them succeed in their personal and professional life. Our institution's values include a belief in a commitment to advance academic consistency, the search for scientific truth, and human development.

The University is determined to educate students to develop the knowledge and skills that will enable them to achieve their professional goals, improve the productivity of their organizations, and provide leadership and service to their communities.

Academics and students engage in vital research projects which are shaping culture, economics, society, and politics. Recent projects have focused on international law, political stability, public administration, community Medical, and urbanization preparing students for the 21st century's globalized workforce.

The university presidency, teaching, and administrative staff are delightedly looking forward to seeing the notable advancement of our university at all levels including research, high-quality education, and constructing relationships with highly qualified international universities as well as openness to society.

The university has an explicit strategy to meet the changes introduced by science and knowledge. This academic community created by academic staff, students, and available human resources can provide an academic environment to enlighten the path for future generations.

The university endeavors to connect the academic environment to international academic communities. The university, currently, is making arrangements to implement the Bologna Process which is a process aimed at ensuring comparability in the standards and quality of higher-education qualifications and this is a significant step into a new stage to obtain accreditation and global recognition.

The university aims to improve the university's level by taking many actions including time management, curriculum development, academic debate, and high-quality research. Further, we are making use of the experiences of highly qualified international universities, scientific conferences, and instant works that lead to better achievement in those areas.

The University has been constantly reinvented and renewed in the face of demographic and policy change. This is to make sure that the new initiatives we take reflect the complexity and multivalency of a diverse and inclusive student community. Recent developments at the university give us the opportunity to further refresh and renew what we offer.

We are certain that the practices would be a good contribution to academic and scientific knowledge, as well as elevate the expectations of students of the whole academic process and raise educational aspirations.

Dr. Nawzad Yahya Bajger, Chairman Of board of the trustees Cihan University Campuses

Dear: Students

You are about to become part of the distinguished tradition of Cihan University – Sulaimnayia. And, whether you are seeking to attend an academic program or improve your career or enrich your life through education, Cihan University - Sulaimnayia is the right choice! More than just engaging your mind, Cihan University – Sulaimnayia engages the whole person. Our mission asserts that education should never be confined to the classroom. Cihan University – Sulaimnayia is committed to the ideal of developing one's total self – intellectually, emotionally and spiritually.

Dr. Nawzad Yahya Bajger
Chairman Of board of the trustees
Cihan University Campuses

5

President of Cihan University-Sulaimnayiaya

We are delightedly looking forward to seeing the notable advancement of our university at all levels including research, high quality education, and constructing relationship with highly qualified international universities as well as openness to the society. The university has an explicit strategy to meet the changes introduced by science and knowledge.

This academic community created by academic staff, students and available human resources can provide an academic environment in Sulaimnayia which is known as the capital of education in Kurdistan and to enlighten the pathof life for students.

The university attempts to connect this academic environment to the international academic communities. Our university, currently, steps into a new stage to obtain accreditation and global recognition. To achieve this aim and improve the university's level, we take many actions including (time management, curriculum development, academic debate, high quality of research, make use of the experiences of the highly qualified international universities, scientific conferences, and instant works) that lead to a better achievement.

Assistant Professor Dr.Omed Rafiq Fatah
President of Cihan University – Sulaimnayiaya

Sulaimnayia

Sulaimnayia

Slemani (Kurdish: سلێمانی , Arabic: السليمانية) also called Sulaimaniya, founded in 1784 by the Kurdish prince Ibrahim Pasha Baban, who named it after his father, Sleman Pasha. Slemani is a city in the east of the Kurdistan Region of Iraq. It is surrounded by the Azmar, Goizha and Qaiwan Mountains in the northeast, Baranan Mountain in the south and the Tasluja Hills in the west. The city has a semi-arid climate with very hot dry summers and cold wet winters.

Best things to do in Sulaimaniya

There's enough to keep you busy for at least a couple of days in Sulaimaniya. It's a great city, with a nice blend of culture and modern attractions, plus plenty of friendly locals to meet.

Free Modren Attraction

It need not be expensive to find enjoyable activities in Sulaimayah. Actually, there are large number of amazing attractions that are free to visit. Here are just 06 ideas.

1. Goizha And Azmar Mountains
2. Azadi Park
3. Slemani Museum
4. Dukan lake
5. Amna Suraka
6. Hazar Merd Cave

◼ Amna Suraka Museum or Red Prison

Perhaps one of the most moving and memorable experiences in Kurdistan is a visit to the Amna Suraka or Red Prison, known by the Kurds as the House of Horrors. From 1979 until 1991, Saddam Hussein's secret intelligence service, the mukharbarat, used the facility as their headquarters and centre for torture and imprisonment during the al-Anfal Campaign, known as the attempted genocide of the Kurdish people.

It was liberated in 1991 by the Peshmerga or Kurdish forces and was turned into a memorial and museum in the early 2000s. It's free to visit and there are English brochures at the main office, as well as a few staff who speak English who are happy to explain how to explore the complex.

CIHAN ART CENTER

ART ART ART ART
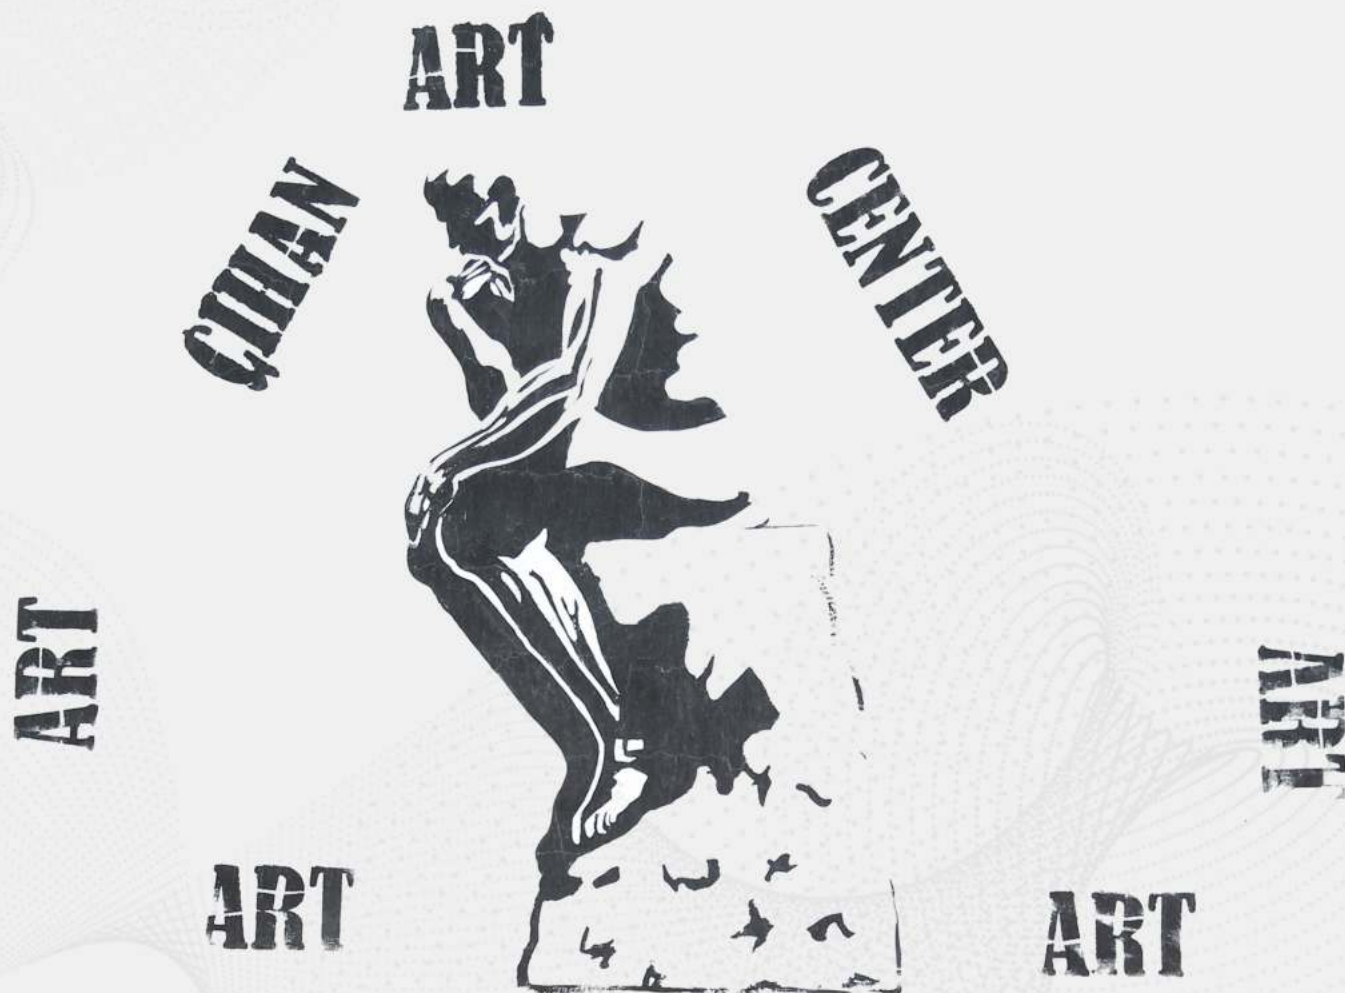

The Cultural & Social Center

The Cultural & Social Center enhances the student community's quality of life. It is designed to accomplish a set of goals in different aspects; Socially, providing a safe place to practice various activities, Environmentally, ensuring a healthy environment for students, Recreational, offering different kinds of entertainment activities both artistic and sports facilities, either indoor or outdoor. Your Campus

■ Cihan Campus

Cihan University-Sulaimaniya campus has numerous resources to aid your studies and make the most of your free time. Once you join Cihan University-Sulaimaniya, you will be on the first step to achieving your dreams. The campus is fully facilitated to meet your requirements such as comfortable classrooms, computer Labs, a football stadium, tennis court, a library, an animal house, and others.

■ Facilities of The Campus

Cihan University Sulaimnayia Facilities is dedicated to supporting the core educational and research missions of the University by maintaining a safe, beautiful, and functional campus environment. Doing so is no small task, and in this section, you can learn about all of the types of skills and personnel that go into maintaining Cihan University Sulaimnayia and other University physical assets.

■ Fields of Science

The goal of the university is to combine Classroom Learning and Field Learning in order to teach using real examples in a hands-on learning environment supported by the most up-to-date science. All scientific courses are updated and modified accordingly on a yearly basis.

Support and facilities

Student Activities

The football field is immediate eye-catchers for anyone who enters the campus. The Sports Centre is located at the backside of the campus. Competition matches are played on weekends.

Cafeterias serving the university

The University cafeteria is located on the ground floor of the Faculty of Administration and Financial Science and also the West block building can be used for an early breakfast, a quick snack between classes or for lunch and dinner. The cafeteria is also used by students who want to socialize with friends and classmates.

Medical Centre

The Medical Centre is a facility that offers general health, medical, and emergency treatments and cares for students.

At the Medical Centre a healthcare professional often a paramedic responds and provides emergency help stabilizing students/staff with life-threatening injuries or conditions and transferring them to a higher level of treatment typically an emergency department.

Medical Unit

The Medical Unit

The Medical Center is a student community-based unit that delivers comprehensive and competent, high-quality primary medical care services to the students.

The Medical Center integrates access to pharmacy, mental, medical, health, and oral medical services. The Medical Center offers its services by emphasizing and organizing coordinated care management for students with multiple medical care needs. And the use of key quality improvement practices, including Medical information technology, Medical Centers to reduce medical disparities. The Center is a student community-based center that delivers comprehensive and competent, high-quality primary medical care services to the students.

Medical Unit Fundamentals

-Deliver comprehensive, competent, high quality primary Medical care, as well as supportive services such as medical education.
-Provide services regardless of students' ability to pay for medical services.
-Develop systems of student-centered and integrated care that responds to the unique needs of diverse medical needs and services for students.

University Facilities

Class Rooms

The classroom attempts to provide a space where learning can take place uninterrupted by outside distractions. Academic staff aim to provide the students with technology in classrooms and learning spaces on campus that is flexible, easy to use, and reliable.

Seminar Halls

These seminar halls are available for use to conduct training, student activities, seminars, conferences, workshops and various departmental association activities.

Computer Labs

The Computer Science Department is running ten computer labs; each lab includes 25 computers with high specifications. All computers are provided with Windows 11 operating system and Microsoft office 2020 package. A variety of updated educational software have been installed to each computer.

However, one of the labs has been equipped for special purposes like graphics with a high-performance hardware. In addition, there is a robotics lab (Arduino base) for projects and a logic circuit design lab that contains 25 sets for more than 100 experiments.

Library

The library was established in 2011 along with the University. The Library is located at the backside of the university next to the registration office. The library catalogs holds a number of books, journals, collections, and media materials for use by the students lending them out, as well as providing various other services for its users. The services and sections that are offered by the library include;

Sections: Books, Technical help, Stacks, Text Books, Lending, References, Computer/Internet Station.

Services: Lending, Inter Library Loan, Photocopy facilities, Reference Service.

Central Library of Cihan University - Sulaimaniya

The Central Library of Cihan University- Sulaimaniya establishment coincides with the opening of Cihan University - Sulaimaniya. The central library provides scientific books and journals in Kurdish, Arabic and English to students, teachers and researchers.

▪ Books

The Central Library of Cihan University - Sulaimaniya contains thousands of titles and books. The Central Library includes various collections of books and general scientific fields, books on law, linguistics, accounting, management, technology, literature, heath sciences, general education, and engineering have a special place in the library.

▪ Scientific journals

A special section of the Central Library has been devoted to collecting and displaying Kurdish and Arabic scientific journals. Therefore, hundreds of scientific papers published in journals are made available in the Central Library available for students and researchers. A special section has also been designated to display the Scientific Journal of Cihan University – Sulaimaniya (SJCUS).

In addition to books and journals, the Central Library of Cihan University - Sulaimaniya has opened a research department. It contains hundreds of bachelor's, master's, and doctoral papers, most of which were written by Kurdish researchers and researchers from the world's universities.

Kurdology Manuscripts in the Ottoman Archives

The Central Library of Cihan University- Sulaimaniya contains valuable texts and manuscripts written about Kurds and Kurdistan in the past. As well as the archive and preservation of documents, The Central Library has opened an archive and documents section for the Manuscripts on the history of Kurds in the Ottoman Archives.

The Ottoman Archives is an important part of the archives and documents section devoted to Kurds and Kurdistan in the Ottoman Archives. The documents contain rare and important information, texts, and manuscripts on the cities and administrative units of Kurdistan, i.e. the three provinces of Mosul, Sharazoor, and Kirkuk. A collection of 15 volumes covers every administrative decision made regarding Kurdish cities, employees, and citizens during the Ottoman period.

A number of old texts and books about Kurds and Kurdistan have been reprinted and displayed in the Archives and Documents Center of Cihan University - Sulaimaniya, including 75 historical books written by European orientalists.

In addition, copies of ancient, political, and social maps of Kurdistan have been collected in international scientific centers and are available in the archives and documents of Cihan University- Sulaimaniya.

Alumni

The university and its community of students appreciate the contributions of its alumni. The University maintains a close relationship with its alumni through outreach programs and a range of professional and social events. It also looks to alumni involvement and assistance for planning and growth objectives.

Career Services

The Career Services at Cihan University of Sulaimaniya support students and alumni who are seeking guidance and assistance in their career development. The purpose of Career Services is to provide the tools and resources they need to make informed decisions about their career path and to help them achieve their career goals. This may include assistance with resume writing, job search strategies, interviewing skills, networking, and more. Additionally, Career Services may offer workshops, career fairs, and other events designed to connect students and alumni with employers and industry professionals.

Alumni

95% of our graduates are either in work or engaged in further study within six months of graduating, according to the Destinations of Leavers from Higher Education survey released in July 2017.
According to the Destinations of graduates from Higher Education survey, which was published in 2022 – 20-23, 95% of our alumni are either employed or enrolled in further education within six months of graduation.

Employability

Our courses are regularly updated to keep them relevant to the current employment market and many of our degree programs are accredited by professional national and international accreditation bodies. These include the:

- ZEvA (Central Evaluation and Accreditation Agency)
- Association for Nutrition (AfN)
- Bar Council
- British Dietetic Association
- Chartered Institute of Procurement and Supply
- Chartered Institute of Personnel and Development
- Health and Care Professions Council
- Institute of Biomedical Science (IBMS)
- Institute of Food Science and Technology (IFST)
- Institute of Healthcare Management
- Law Society

International students

International students are enrolled at Cihan University Sulaimanyah recognized by both the Kurdish Ministry of Higher Education and Scientific Research and the Iraqi Ministry of Higher Education and Scientific Research. Include countries that have students enrolled at the university.

We take great pride in our multicultural community at Cihan University Sulaymaniyah, which is located in the heart of Sulaymaniyah. The fairly largest student community, the cultural capital is home to a large number of students from different countries.

You will learn from lecturers who are experts in their subjects and many of whom also do research, write books, or provide policy advice to governments. You'll gain from guest lectures as well as the University's own faculty members because business people visit the campus to speak with students and provide them with insights into their industry. We've previously welcomed specialists from companies like:

- Apple
- Cisco
- Emirates Airlines
- The Guardian
- Microsoft
- the MOBO Awards
- O2

Work experience:

We create and maintain relationships with businesses so that our students can experience working while pursuing their education. All of our undergraduate courses incorporate some aspect of practical learning, including a placement, client project, or on-campus employment. You'll have the chance to learn useful skills and improve your employability as a result.

Department of Law

College of Law and International Relations

■ Law Department

The establishment of the department of law at Cihan University – Sulaimaniya coincided with the establishment of the university itself in 2011. It includes a department of law only for the morning studies. The time required for study in college is five years, after which the graduates are awarded bachelor's degrees in law.

The graduates will be taught and learn the necessary legal skills and acquire the knowledge needed; in order to provide society and various sectors with highly qualified graduates to work in the field of law, whether as lawyers, investigators, judges, prosecutors, or any other role in the justiciary and legal spheres. Our students will be provided with a useful opportunity to observe how the law works in practice, whilst being trained and supervised by practicing legal professionals.

■ Definition

The Department of Law at Cihan University - Sulaimani awards bachelor's degrees to its graduates, following an integrated curriculum, according to the annual curriculum, and through a qualified faculty, for five years, the program includes the study of the most important applicable laws spread over school years according to their importance and ranking, and ends with the study of the most important supplementary laws, which include most of those laws that have a direct impact on citizens, private, public rights, and freedoms.

■ Vision

The Department of Law at Cihan University - Sulaimani endeavors to achieve a prominent position among law colleges in the Kurdistan Region and Iraq, strives to meet the needs of society for holders of legal degrees, and works to gaining the trust of students and beneficiaries of legal science, and adopting best academic methods and strategies to provide a unique teaching and learning environment.

■ Jobs Opportunities

Law graduates have the opportunity to work in a number of fields, including:

1. Working as a lawyer in different courts according to the requirements of the Lawyers Law, after becoming a member of the Bar Association.

2. Working on contract basis with companies and private sector institutions as legal advisors.

3. Applying to the Judicial Institute, in order to qualify them to work as judges, according to the requirements of the Judicial Institute Law in the Kurdistan Region.

Department of English Language

Department of English Language

About the Department

The department of English was founded in 2011 to have more graduates in the field of English language especially after the fast developments in Kurdistan Region. Since then, it has witnessed dramatic changes regarding the academic staff, the number of students, the subjects taught, and the facilities offered. The graduate is awarded a bachelor certificate in English language and literature.

Vision

The department of English is committed to ensure that all students make greater progress than expected across all stages as far as English language is concerned. The department is interested in encouraging the students to be bold at every possible opportunity within the subject area. The department is entirely devoted to develop both the knowledge of English language and the skills students are supposed to have. Everyone nowadays is expected to speak English, but not everyone can go deep to explore the mechanism of language academically and this is where the role of the department comes; it provides students with the necessary tools required for identifying how language operates at various fields including mainly linguistics and literature.

Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

Department of Business Administration

Business Administration Department

Business Administration Department is one of the important departments at Cihan University – Sulaimaniya. It was established in 2012. The period of time required for the study is four years, after which the graduates is awarded bachelor's degree in Business Administration.

The department of Business Administration at Cihan University – Sulaimaniya, seeks to become one of the leading departments locally and regionally. The goal of the Business Administration Department is to teach and prepare students to become business leaders around the world. To get there, we need to develop and update the curriculum, hire qualified teachers, give the department access to modern technology, and improve its relationship with society. This will help us provide valuable services in the different areas of administration.

■ Vision

Our vision is to make the Department of Business Administration a valuable and well-known place to get a business administration education and train professional managers who can work in the job market and become part owners of projects and industries at the national and international levels.

■ Mission

We train a variety of present and future business management professionals, and we teach them how to handle the problems of the local and global business and administration sectors confidently and successfully.
The Department of Business Administration is committed to giving students a high-quality business education. It does this by hiring experienced lecturers with Ph.D and Master's degrees from advanced countries around the world, offering a modern curriculum in business administration science, and building strong academic relationships with local and international universities and other academic centers of business administration.
We keep improving our educational system to add learning value and help our department, academic staff, teachers, and students move forward.

Department of Accounting

Accounting Department

The Accounting Department provides specialists in the field of accounting and finance, accounting has been known as the language of business, which is concerned with supporting decision-makers with the necessary information that enables them to make appropriate and objective decisions that work to develop the company's work and improve it for the better. Accounting also provides information about the company's resources, the sources of these resources, and the extent to which these resources are used effectively at work. The task of preparing, declaring and interpreting this information is the responsibility of the accountant, who is an integral member of the leadership team in any company.

■ Vision

The Accounting Department is looking forward to achieve a leadership and excellence role in the field of accounting work locally and regionally.

■ Mission

The Accounting department seeks to provide an educational, training, and advisory services that are aimed to develop the community and meet the requirements of the labor market by provide a specialized staff in the financial and accounting fields. This can be accomplished by attract an efficient and professional teaching staff, provide a developed educational curriculum, and build good relationships with other institutions in order to provide services that are relevant to the financial and accounting business with respect to the following values:

1. Transparency in dealing with others.

2. Confidence.

3. Truthfulness and honesty.

4. Quality and constant development.

■ Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

Department of Architectural Engineering

College of Engineering

Architecture Department

The Department of Architectural Engineering is one of the most important Scientific departments at Cihan University – Sulaimaniya. It was established in 2014 with theoretical and practical educational programs in Architectural design, urban, interior, and landscape design. The study Program at the Department is five years. Graduates are awarded a degree of Bachelor in architectural engineering.

The department continues to constantly innovate itself regarding the quality of education, and faculty members. The department offers in addition a qualified academic staff, design studios, ateliers, and modern classrooms that intellectually stimulate learning and researching.

Our vision is to enhance an identity for graduates in order to form a base of innovators and specialists in the domain of Architectural Engineering. In addition, graduates obtain a solid foundation to continue their postgraduate study of master degrees in the different approaches of Architectural Engineering.

Mission

The Department of Architectural Engineering is one of the most important departments at Cihan University/Sulaimaniya. It was established in 2014 with theoretical and practical educational programs in Architectural design, urban, interior, and landscape design. The period of study at the Department is five years. Graduates are awarded a degree of Bachelor in architectural engineering. Our department continues to constantly innovate itself regarding the quality of education, and faculty members. The department offers in addition to qualified academic staff, Design studios, ateliers, and modern classrooms that intellectually stimulate studying and researching environment.

Vision

The Department of Architectural Engineering's vision is to enhance an identity for graduates in order to form a base of innovators and specialists in the domain of Architectural Engineering, particularly, now society has a growing interest in the future value and the cultural value of buildings. In addition, graduates will obtain a solid foundation to continue their postgraduate study for master's degrees in the different approaches of Architectural Engineering.

■ Department of Translation

The Department of Translation in Cihan University – Sulaimaniya is one of the outstanding departments, as it is the corner stone of this university. The study has begun in the Department in the academic year 2018-2019. The students are given different materials in Translation studies, Language and Linguistics, and Literature. It qualifies the alumni to be translators, English teachers, and employees wherever translation is needed. They are also qualified to continue their higher education for the M.A and PhD in Translation studies. The text books and materials have been chosen carefully to cope with the latest development of international universities in the world. The staff members work together to create a typical learning and teaching atmosphere as one team and as a family.

Mission

Equip individuals with the essential expertise and develop abilities required to address the demands of the labor market in the field of translation and interpretation (English-Kurdish and Kurdish-English), while adapting to shifts in the business landscape. This will be achieved by consistently enhancing the educational experience and broadening the scope of both theoretical and practical research initiatives.

Vision

The department aims to serve as a hub for revitalization and innovation, fostering the development of highly skilled professionals who excel in the competitive business landscape and adeptly incorporate suitable technology in translation and interpretation.

Department of
Medical Laboratory Analysis

■ Department of Medical Laboratory Analysis

Medical laboratory Analysis (MLA) is an important part of healthcare system. It is playing a crucial role in the diagnosis, treatment, and monitoring of diseases. This department was established in 2019-2020. The duration of study is four years and granted a bachelor's degree in Medical laboratory science. The programs of the department qualify the students to prepare graduates to work in clinical laboratories in hospitals, clinics, industry, and research laboratories. It provides a didactic and clinical experience that enables the student to work in the field of pathology, hematology, biochemistry, serology, and microbiology. use quality control techniques to aid in the diagnosis, treatment, and monitoring of patients. Thus, the curriculum of Cihan University-Department of Medical Laboratory Analysis is designed to teach the concepts and practices of laboratory science and to prepare students for lifetime learning in biomedical science.

A qualified graduate who has completed his academic studies and received a bachelor's degree in medical laboratory sciences. A graduate also has the necessary knowledge to perform his duties.

■ Vision

This program is designed to develop students' skills to use modern equipment to get accurate results in the diagnosis of diseases, problem-solving, working independently, and medical ethics in hospitals. Graduates of this department are competent to continue their postgraduate studies in different fields of medical laboratory sciences.

■ Mission

The department's strategies are to graduate medical laboratory technologists with basic and advanced diagnostic techniques that provide clinical information to physicians, pathologists, researchers, and other healthcare services.

■ Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

For the most up-to-date information on minimum admission requirements, guides, and instructions, please scan the following QR code:

■ Objectives

1. Display honesty, reliability and integrity when performing laboratory procedures.
2. Display ethical conduct and good interpersonal relationships during classes and with instructors, students, patients, and members of the healthcare team.
3. Adhere to established safety procedures.
4. Maintain confidentiality of patient information and test results.
5. Interpret and evaluate patient results and suggest or select appropriate additional testing.
6. Use quality assurance principles and practices to ensure the accuracy and reliability of laboratory information.

Department of General Education

General Education Department

The Department of General Education is considered as an academic program keen to the quest of excellence in teaching, learning and community service for the production of wide-ranging and dedicated teachers and leaders who can well respond to the challenges of Education in their community. The program focuses on standardized levels of modern educational technology consistent with social awareness of working in educational institutions in both public and private sectors. The department accepts graduates of high school from both scientific and literary branches. The duration of the study is four years after which the students receive a certificate of Bachelor in general education.

■ VISION

The department of general education is dedicated to ensuring all students in making more development in the areas of education. The vision of this distinguished department is to qualify teachers and leaders in areas of particular educational progress and preparing a group of educational leaders and thinkers who can match their peers nationally and internationally.

■ MISSION

The department of general education offers a wide and diverse field that encompasses a variety of courses to satisfy the social sciences requirements for the undergraduate degree in the field of education. Also, offers to use modern teaching methods and techniques to commit their contributions as an actual factor in constructing the community.

■ Aim

The aim of the Department is to ensure graduates to have efficient competence and performance in being distinguished teachers, teacher educators, educational leaders and supervisors who can successfully respond to the challenges of the educational system. Also, our graduates will be able to teach in both public and private sectors.

■ Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

Department of Anesthesia

Department of Anesthesia

The department's goal is to prepare health staff specialized in anesthesia and intensive care techniques working in health institutions, where the graduate prepares the patient before performing the surgery in the operating theater and this includes giving the patient appropriate anesthesia doses in conjunction with the anesthesiologist and performing the intensive care tasks of the patient and everything related to operating and maintaining devices And anesthesia equipment as well as narcotic drugs.

■ Vision

The department provides various health institutions with specialized health staff to fill the shortfall in the field of anesthesia and intensive care today and in the future.

■ Mission

1. The department's vision is to be pioneers in this delicate specialization and to provide health services by anesthesia technicians and paramedics with efficient and distinguished skills, for patient safety and community service.

2. Learning the students how professionally to work in anesthesia services in perioperative care, pain management and critical care.

3. Contribute to the success of the Medical sector (private and Public) and Medical System as a general.

Department of Medical Microbiology

Department of Medical Microbiology

Medical microbiology, also known as clinical microbiology, is a subdiscipline of microbiology dealing with the study of microorganisms (parasites, fungi, bacteria, viruses, and prions) capable of infecting and causing diseases in humans. As with other specialties in medicine, the evolution of medical microbiology is essentially a response to clinical needs. At its core is the study of the pathogenesis and epidemiology of these microorganisms, and its practical applications lie in the form of diagnostic and therapeutic guidance – intrinsically a supportive role in clinical practice.

■ Vision

The Medical Microbiology department aims to be a leading center of excellence in teaching and research in the fields of Medical Microbiology, Immunology, and Parasitology. The Microbiology department seeks to achieve the country's needs with highly qualified medical staff capable of dealing with infectious diseases of different microbiological causes (bacteria, viruses, parasites or fungi) and diseases that occur due to immunological disorders, to improve the quality of people life. promote creative, innovative, and inventive research in Medical Microbiology, Immunology, and Parasitology.

■ Mission

•To graduate medical staff with good knowledge, skills, and attitude in dealing with microbiological and immunological health problems.
•To contribute to the improvement of clinical care and public health through pursuit of excellence in training and research in the diagnosis, management, and control of infectious diseases.

■ Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

Department of Human Resources Management

Human Resource Management Department

■ Human Resource Management Department

Human Resource Management Program was established in 2022. The period of time required for the study is four years, after which the graduate is awarded a bachelor's in Human Resource Management. This bachelor's degree is fully dedicated to producing graduates who would pursue job opportunities in the international arena with their in-depth knowledge and skills in human resources as well as a solid foundation in business and management.

The medium of instruction is English, with a curriculum designed to enable students to acquire cultural and language skills and to develop an appreciation for various economic, social, psychological, and political processes that impact human resource issues in organizations around the globe. The emphasis throughout the program is to encourage students to develop an innovative approach to recognizing opportunities and risks, to acquire analytic and information technology skills for swift decision-making, and to strengthen communication skills for effectively executing human resource strategies.

■ Vision

Having gone through an educational program enhancing problem solution and communication skills, graduates of the Human Resources Management Department step into the professional life with up-to-date information on computers and other technologies. The program aims to bring up creative professionals who take the initiative and, at the same time, who can express themselves effectively.

■ Mission

1. The curriculum as well as course contents are continually revised and updated in the light of recent developments in the human resource management profession and the recommendations of the managers at the professional world.

2. The theoretical knowledge and skills are taught in applied settings using case studies, team work, and project based methods aimed at facilitating learning through simulations of rea-life cases and contexts.

3. Courses which involve computer technology are delivered in modern computer laboratories. The curriculum enables students to acquire knowledge and skills in a multitude of areas critical for developing perspective and knowledge as well as providing courses that lead to specialization in human resources.

4. Staff at the department consists of successful and prominent academicians who have adopted student-centered learning as their teaching philosophy.

5. Academic staff members at the Department not only possess numerous academic studies and projects published both nationally and internationally but also continuously contribute to the professional world with their extensive knowledge.

■ Entry Requirements

The Ministry of Higher Education and Scientific Research specifies the minimum admission requirements, guides, and instructions for each program of study every year.

Department of
Digital Media and Marketing

■ Digital Media and Marketing Department

Digital Media and Marketing Department was established in 2022-2023 Providing bachelor's degree graduates with the skills and knowledge necessary in order to capture the attention of prospects through the buyer's journey and turn them into customers. This bachelor's degree enables students to use modern technology and become digital pioneers and help shape their future.

Taking traditional approaches and combining them with advanced technological innovations to equip students to become qualified and talented professionals. Using the most advanced tools in digital media to create immersive and emergent artworks through the use of various software packages and programming tools.

The program offers specialized courses to address the demands of businesses, allowing students to build globally competitive abilities that reflect the global culture and technological developments, particularly in the field of marketing.

■ Vision

The Digital Media Department aims to transfer the function of the media to a new extent through the use of technologies that are capable of conveying news and images in an effective manner to build society and overcoming negative aspects. It charts an exciting career path in the dynamic field of digital media. With concentrations in Digital Journalism, Digital Media Leadership, and Digital Media Production, the major is a hub of creativity, collaboration and innovation.

■ Mission

The department aspires to prepare professionals in the field of digital media and marketing, that uses modern communication techniques to deliver news and create the required positive interaction through the following:

1- Equip students with the skills and experiences to pursue careers in news, media production and post-production, entertainment, advertising, and media management.

2- Building strong skills in media management across multiple platforms, such as video, mobile devices and applications, photography, print, radio, television, web, and social media.

3- Students will experience and advance hands-on training in a range of technology. Starting from cameras, control room, and newsroom and graphics software. Our students will be capable of using video production

equipment (cameras, lighting, and sound recording) and do writing and online design in computer labs.

Providing a Fast Forward workshops taught by industry professionals, field trips to the National Association of Broadcasters convention, activities with the Society of Professional Journalists, and master classes with visiting film-makers.
